

Want to make a better basket or drip tray?

Our welded mesh can make the job easier and save manufacturing cost.

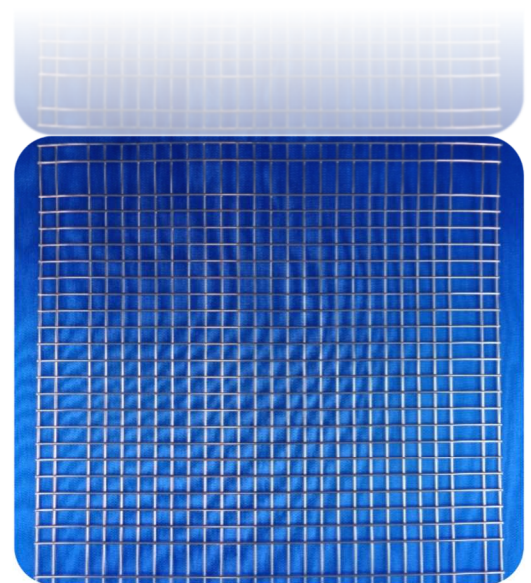

Your design determines what wires need to be dropped.

- Create gaps, exactly where the frame will be welded.
- Easy frame to mesh alignment.
- Less cutting of edge wires and grinding.
- Less welding errors frame to mesh.
- Overall better quality and reduced safety concerns for your customers.

Your end product will not only look better

It will perform better!

Let us work with you on your mesh design!

Mesh Specifications

Material	Steel, Stainless Steel and Alloy Steel
Opening	3 – 50 mm clear mesh opening
Wire	0,4 – 2 mm depending on opening
Size	Piece sizes and gaps can be designed
